

AI-Powered Customer Support Ticketing System

GitHub Project Documentation

Author: Jammula Sri Charan Yadav

Platform: Salesforce CRM + Agentforce AI

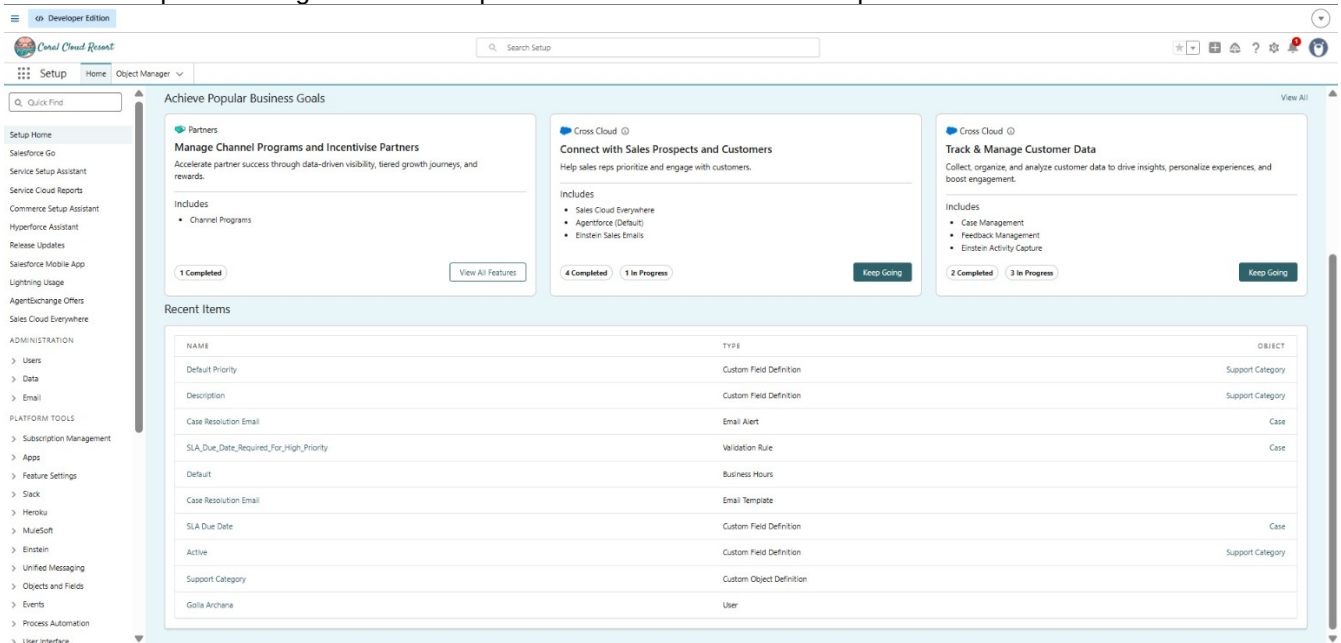

Repository: <https://github.com/charanyadav2>

Project Overview

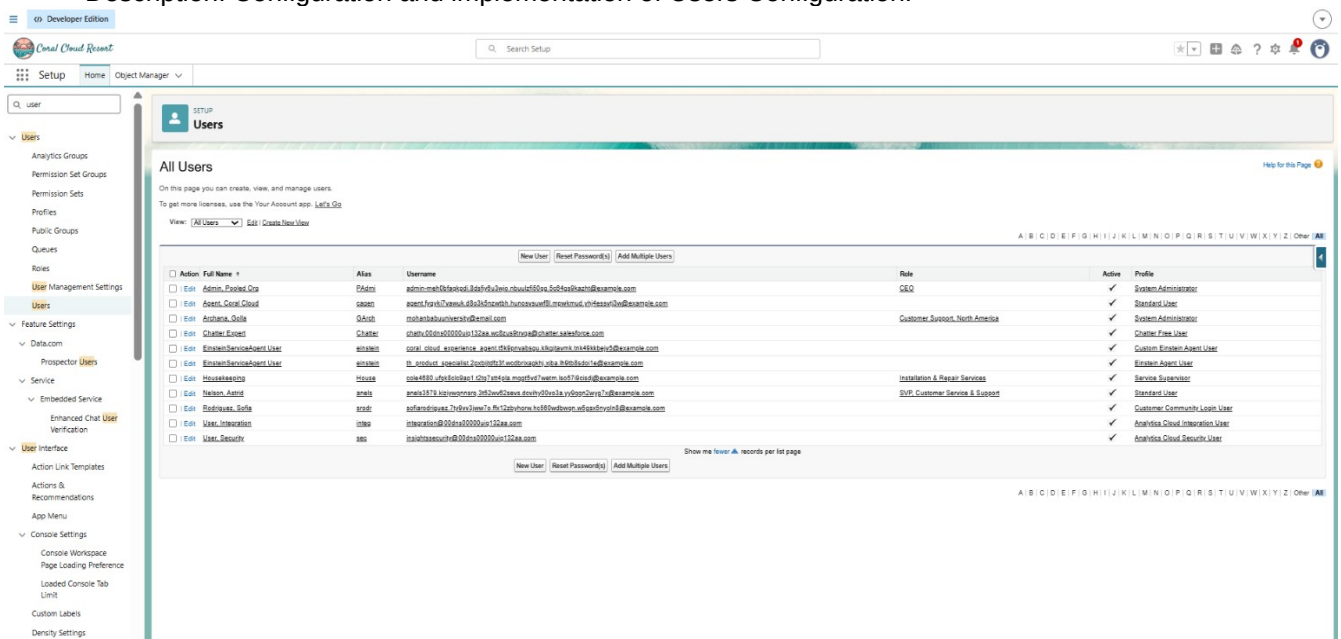

This project implements an AI-powered customer support ticketing system using Salesforce CRM and Agentforce AI. The system centralizes customer support operations, automates workflows, tracks SLA compliance, and improves support efficiency.

Features: Case Management, SLA Tracking, Validation Rules, Email Alerts, Agentforce AI Integration, Lightning App, Reports & Analytics, User Management.

Description: Configuration and implementation of Salesforce Setup Home.

Description: Configuration and implementation of Users Configuration.

Description: Configuration and implementation of Lightning Experience App Manager.
